Icon sets are collections of icons that can be used to decorate the folders of your choice. In other words, icon sets give an impression of how folders will look on the desktop. This is especially useful to get a start with icon design. There are a lot of ready-made icon sets available on the Internet. This icon set is based on one of the most popular icon sets, which was designed by Nathan Nenadovic. It is licensed under the Creative Commons Attribution 3.0 Unported License. You can use these icons for any purpose. Each icon has a different color, and the collection includes various shades of gray, as well as dark and light blue. All icons are available in ICO format, which means you can use them in any software application, such as Mylyn, VirtualBox, Cinepaint, Kdenlive or other.
