Blast from the Past/Spinning Galaxy Review: Expect a long narrative with numerous events. And the story I will tell is probably almost as significant as the game itself. If I may be brief, I'll do my best to render a summary without only leaving out the

necessary details. So I'll tell you roughly the story of the protagonist, Arden. Arden grew up in a village. During the first years of his life, he was sheltered in an isolated household where he was being trained to be a soldier or a priest in the Lords, who led the world of the Lands Between. At the age of fifteen, Arden was found by a group of adventurers outside the village, who had been seeking a legendary sword and Arden was recruited to enter the lands with them in the search. As he had grown up wanting to do something different from his old life, Arden decided to enter the Lands Between, and ended up becoming a knight of the Elden Ring, which

was that time a sort of guild. I will tell you about the rest later. If you are about to say that this could have easily been introduced without coming so late and boring the reader, I ask you to read on. This game brought back memories for me since its very beginning (maybe not everyone can relate, but it has a strong impact on people who were fans of adventure games like "Planescape: Torment" or "Fallout"). The very first time I played it, I could not get past the prologue, but I was just amazed by the whole story of Arden and everything that happened to him. I was pretty upset at the time, thinking of all the hours I would have to play to see what happens next.

But my disappointment soon gave place to a great sense of achievement when the game finally came to its conclusion. I really recommend giving this game a shot if you have the chance, although it is not the typical RPG on the market. I'm sorry if the review is lukewarm, but I hope it will help the reader understand why I am excited about this game. Gameplay The game has three main modes: 1. Standard mode 2. Adventure mode 3 bff6bb2d33

Hi everybody. Welcome to this week's Fantasy notes, based on my round-up of anime on FlixChatter.com.

Where and when did fantasy, and more generally story-telling through fiction, emerge? It is of particular interest when considering the rise and fall of fantasy literature. Who are the earliest protagonists to step onto the pages of fiction? The following is a short and amateurish attempt to track this phenomenon.

The first fiction written down in the West was written by the ancient Greeks.
A certain Eucharistos (Euestes) from Boeotia in Thessaly wrote a Panegyric or praise poem in gratitude to the godEgeaster, which has been kept into the Greek original and is translated into Latin. In so doing, he is probably the first person to systematically use symbols and conventions in written fiction
